# SILENT DISCO KING

How it works

Transmitter

Setting up your Parakeet Transmitter

1

Step one
Press and hold the On button to turn the transmitter on.

2

Step two
Connect to an audio source using the cables provided.

3

Step three
Connect a microphone. Only use SDK supplied microphones.

4

Step four
Hold channel button to assign a channel to the transmitter. The LED will diplay the colour of the channel you're transmitting to.

5

Step five
Turn your headphones by pressing and holding down the on button.

Troubleshooting
Check out the back of this sheet for tips on solving problems that you may run into.

a **Power Button**
Switches transmitter on and off.

b **Channel Indicator**
LED illuminates to indicate the channel. Corresponds to colour on headphones.

c **Mic Input**
Direct input for microphones. Only use SDK supplied microphones.

d **Audio input**
Connect to audio device using cable provided.

e **Channel selector**
Indicates what channel you're transmitting to.
1. Red / 2. Green / 3. Blue

f **DC input**
Input for mini-USB power adaptor to charge.

Troubleshooting

No Audio?

· Check your music playing device is working, connected correctly, playing music with volume turned up full.

· Try a different device and audio cable.

· Ensure receivers / headphones are switched on, connected to correct channel and have volume up.

No Power?

· Check the transmitter is fully charged and switched on.

Signal cuts out, interference or reduced range?

· Ensure there is no interference caused by other wireless equipment in the vicinity.

· If using 2 or more transmitters simultaneously make sure each is on different channels (frequencies). You cannot use 2 transmitters on the same channel in the same place. They will cancel each other out, resulting in little or no signal.

· Make sure the transmitter is in range.
